DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 12 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 12, line 1, Claim 10 is apparatus claim, not the method claim. claim 10 does not have steps of providing and inserting.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 9, 10 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hara (U.S. Patent 4,905,588).

Hara teaches : Regarding Claim 1, an apparatus for separating two flanges (h) comprising: a first prying grip (i) having at least one flange contact member, a second prying grip (i) having at least one flange contact member (Fig. 5); Regarding Claim 14, an apparatus for separating two split flanges (h), comprising: a first prying grip (i) having at least one flange contact member;

Art Unit: 3726

a second prying grip (i) having at least one flange contact member; and at least one recess residing in one of said two flanges adapted to accept said flange contact members (Fig. 5).

Hara fails to teach a means for separating the flange contact members.

But Official Note is taken that utilizing means for separating flange contact members like pliers are well known in the art and It would have been obvious to one of ordinary skill in the art at the time of the invention was made to using that kind of means on the apparatus of Hara so as to pry the flanges in easier way.

Regarding Claims 9 and 10, Official Note is taken that fabricating grip member from a group consisting of steel and other iron alloy and a material having a lower hardness value than material from which the flanges are composed are well known in the art.

Allowable Subject Matter

3. Claims 11,13,18-28 are allowed.

4. Claims 2-8, 15 - 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
